

STATUS OF AVIATION OPERATIONS WITHIN THE KENYAN AIRSPACE

Nairobi 11thSeptember 2024...The Kenya Civil Aviation Authority (KCAA) acknowledges the challenges experienced by the aviation industry and the inconvenience caused to passengers and other stakeholders due to the ongoing unlawful strike.

Despite the disruption, we wish to assure the public that Air Navigation Services, including Air Traffic Control (ATC) operations, are fully operational and remain unaffected. We are committed to ensuring the safe and efficient management of Kenya's airspace during this period.

Aircraft operations—both take-offs and landings—are being handled without delays, and efforts are underway to address any backlog swiftly. We are actively monitoring the situation and will provide timely updates on airport operations as new developments arise, ensuring the safety, security, and convenience of air travel remain our top priority.

We extend our appreciation for the patience and cooperation shown by aviation consumers and stakeholders during this period

-Ends-

Notes to Editor:

Kenya Civil Aviation Authority (KCAA) is the regulatory authority established by the Civil Aviation Act, 2013 as amended in 2016 with the primary functions of regulation and oversight of aviation safety & security; economic regulation of air services and development of Civil Aviation; provision of air navigation services, and training of Aviation personnel. KCAA undertakes these functions guided by the provisions of the Convention on International Civil Aviation, related ICAO Standards and Recommended Practices (SARPs), the Kenya Civil Aviation Act, 2013, and the civil aviation regulations.
