SECTION II INSTRUCTIONS TO TENDERERS

2.1 Eligible tenderers

- 2.1.1. This Invitation to tender is open to all tenderers eligible as described in the instructions to tenderers. Successful tenderers shall provide the services for the stipulated duration from the date of commencement (hereinafter referred to as the term) specified in the tender documents.
- 2.1.2. The procuring entity's employees, committee members, board members and their relatives (spouse and children) are not eligible to participate in the tender unless where specially allowed under section 131 of the Act.
- 2.1.3. Tenderers shall provide the qualification information statement that the tenderer (including all members, of a joint venture and subcontractors) is not associated, or have been associated in the past, directly or indirectly, with a firm or any of its affiliates which have been engaged by the Procuring entity to provide consulting services for the preparation of the design, specifications, and other documents to be used for the procurement of the services under this Invitation for tenders.
- **2.1.4.** Tenderers involved in corrupt or fraudulent practices or debarred from participating in public procurement shall not be eligible.

2.2 Cost of tendering

- **2.2.1** The Tenderer shall bear all costs associated with the preparation and submission of its tender, and the procuring entity, will in no case be responsible or liable for those costs, regardless of the conduct or outcome of the tendering process.
- 2.2.2 The price to be charged for the tender document shall not exceed Kshs.1,000/=
- **2.2.3** The procuring entity shall allow the tenderer to review the tender document free of charge before purchase.

2.3 Contents of tender documents

2.3.1. The tender document comprises of the documents listed below and addenda issued in accordance with clause 6 of these instructions to tenders.

- i) Instructions to tenderers
- ii) General Conditions of Contract
- iii) Special Conditions of Contract
- iv) Schedule of Requirements
- v) Details of service
- vi) Form of tender
- vii) Price schedules
- viii) Contract form
- ix) Confidential business questionnaire form
- x) Tender security form
- xi) Performance security form
- 2.3.2. The Tenderer is expected to examine all instructions, forms, terms, and specifications in the tender documents. Failure to furnish all information required by the tender documents or to submit a tender not substantially responsive to the tender documents in every respect will be at the tenderers risk and may result in the rejection of its tender.

2.4 Clarification of Documents

- 2.4.1. A prospective candidate making inquiries of the tender document may notify the Procuring entity in writing or by post, fax or email at the entity's address indicated in the Invitation for tenders. The Procuring entity will respond in writing to any request for clarification of the tender documents, which it receives no later than seven (7) days prior to the deadline for the submission of tenders, prescribed by the procuring entity. Written copies of the Procuring entities response (including an explanation of the query but without identifying the source of inquiry) will be sent to all prospective tenderers who have received the tender documents"
- 2.4.2. The procuring entity shall reply to any clarifications sought by the tenderer within 3 days of receiving the request to enable the tenderer to make timely submission of its tender.

2.5 Amendment of documents

- 2.5.1. At any time prior to the deadline for submission of tenders, the Procuring entity, for any reason, whether at its own initiative or in response to a clarification requested by a prospective tenderer, may modify the tender documents by issuing an addendum.
- 2.5.2. All prospective tenderers who have obtained the tender documents will be notified of the amendment by post, fax or email and such amendment will be binding on them.
- 2.5.3. In order to allow prospective tenderers reasonable time in which to take the amendment into account in preparing their tenders, the Procuring entity, at its discretion, may extend the deadline for the submission of tenders.

2.6 Language of tender

2.6.1. The tender prepared by the tenderer, as well as all correspondence and documents relating to the tender exchanged by the tenderer and the Procuring entity, shall be written in English language. Any printed literature furnished by the tenderer may be written in another language provided they are accompanied by an accurate English translation of the relevant passages in which case, for purposes of interpretation of the tender, the English translation shall govern.

2.7 **Documents Comprising the Tender**

The tender prepared by the tenderer shall comprise the following components:

- (a) A Tender Form and a Price Schedule completed in accordance with paragraph 9, 10 and 11 below.
- (b) Documentary evidence established in accordance with Clause 2.11 that the tenderer is eligible to tender and is qualified to perform the contract if its tender is accepted;
- (c) Tender security furnished is in accordance with Clause 2.12
- (d)Confidential business questionnaire

2.8 Form of Tender

2.8.1 The tenderers shall complete the Form of Tender and the appropriate Price Schedule furnished in the tender documents, indicating the services to be performed.

2.9 **Tender Prices**

- 2.9.1 The tenderer shall indicate on the Price schedule the unit prices where applicable and total tender prices of the services it proposes to provide under the contract.
- 2.9.2 Prices indicated on the Price Schedule shall be the cost of the services quoted including all customs duties and VAT and other taxes payable:
- 2.9.3 Prices quoted by the tenderer shall remain fixed during the term of the contract unless otherwise agreed by the parties. A tender submitted with an adjustable price quotation will be treated as non-responsive and will be rejected, pursuant to paragraph 2.22.
- 2.9.4 Contract price variations shall not be allowed for contracts not exceeding one year (12 months)
- 2.9.5 Where contract price variation is allowed, the variation shall not exceed 10% of the original contract price.
- 2.9.6 Price variation requests shall be processed by the procuring entity within 30 days of receiving the request.

2.10 **Tender Currencies**

2.10.1 Prices shall be quoted in Kenya Shillings unless otherwise specified in the appendix to in Instructions to Tenderers

2.11 Tenderers Eligibility and Qualifications.

- 2.11.1 Pursuant to Clause 2.1 the tenderer shall furnish, as part of its tender, documents establishing the tenderers eligibility to tender and its qualifications to perform the contract if its tender is accepted.
- 2.11.2 The documentary evidence of the tenderers qualifications to perform the contract if its tender is accepted shall establish to the Procuring entity's satisfaction that the tenderer has the financial and technical capability necessary to perform the contract.

2.12 **Tender Security**

- 2.12.1 The tenderer shall furnish, as part of its tender, a tender security for the amount and form specified in the Invitation to tender.
- 2.12.2 The tender security shall be in the amount not exceeding 2 per cent of the tender price.
- 2.12.2 The tender security is required to protect the Procuring entity against the risk of Tenderer's conduct which would warrant the security's forfeiture, pursuant to paragraph 2.12.7
- 2.12.3 The tender security shall be denominated in a Kenya Shillings or in another freely convertible currency and shall be in the form of:
 - a) A bank guarantee.
 - b) Cash.
 - c) Such insurance guarantee approved by the Authority.
 - d) Letter of credit
- 2.12.4 Any tender not secured in accordance with paragraph 2.12.1 and 2.12.3 will be rejected by the Procuring entity as non responsive, pursuant to paragraph 2.20
- 2.12.5 Unsuccessful tenderer's security will be discharged or returned as promptly as possible as but not later than thirty (30) days after the expiration of the period of tender validity prescribed by the procuring entity.
- 2.12.6 The successful tenderer's tender security will be discharged upon the tenderer signing the contract, pursuant to paragraph 2.29, and furnishing the performance security, pursuant to paragraph 2.30.
- 2.12.7 The tender security may be forfeited:
 - (a) If a tenderer withdraws its tender during the period of tender validity specified by the procuring entity on the

Tender Form: or

- (b) In the case of a successful tenderer, *if* the tenderer fails:
- (i) to sign the contract in accordance with paragraph 30

ΔI

- (ii) to furnish performance security in accordance with paragraph 31.
- (c) If the tenderer rejects, correction of an error in the tender.

2.13 Validity of Tenders

- 2.13.1 Tenders shall remain valid for 90 days or as specified in the invitation to tender after date of tender opening prescribed by the Procuring entity, pursuant to paragraph 2.18. A tender valid for a shorter period shall be rejected by the Procuring entity as nonresponsive.
- 2.13.2 In exceptional circumstances, the Procuring entity may solicit the Tenderer's consent to an extension of the period of validity. The request and the responses thereto shall be made in writing. The tender security provided under paragraph 2.12 shall also be

suitably extended. A tenderer may refuse the request without forfeiting its tender security. A tenderer granting the request will not be required nor permitted to modify its tender.

2.14 Format and Signing of Tender

- 2.14.1 The tenderer shall prepare two copies of the tender, clearly / marking each "ORIGINAL TENDER" and "COPY OF TENDER," as appropriate. In the event of any discrepancy between them, the original shall govern.
- 2.14.2 The original and all copies of the tender shall be typed or written in indelible ink and shall be signed by the tenderer or a person or persons duly authorized to bind the tenderer to the contract. All pages of the tender, except for unamended printed literature, shall be initialed by the person or persons signing the tender.
- 2.14.3 The tender shall have no interlineations, erasures, or overwriting except as necessary to correct errors made by the tenderer, in which case such corrections shall be initialed by the person or persons signing the tender.

2.15 Sealing and Marking of Tenders

2.15.1 The tenderer shall seal the original and each copy of the tender in separate envelopes, duly marking the envelopes as "ORIGINAL" and "COPY." The envelopes shall then be sealed in an outer envelope.

The inner and outer envelopes shall:

- (a) be addressed to the Procuring entity at the address given in the invitation to tender
- (b) Bear, tender number and name in the invitation to tender and the words: "**DO NOT OPEN BEFORE WEDNESDAY, 11**TH MARCH, **2020** AT 11.00AM.
- 2.15.3 The inner envelopes shall also indicate the name and address of the tenderer to enable the tender to be returned unopened in case it is declared "late".
- 2.15.4 If the outer envelope is not sealed and marked as required by paragraph 2.15.2, the Procuring entity will assume no responsibility for the tender's misplacement or premature opening.

2.16 **Deadline for Submission of Tenders**

- 2.16.1 Tenders must be received by the Procuring entity at the address specified under paragraph 2.15.2 no later Than Wednesday, 11th March, 2020 at 11.00am
- 2.16.2 The procuring entity may, at its discretion, extend this deadline for the submission of tenders by amending the tender documents in accordance with paragraph 6, in which case all rights and obligations of the procuring entity and candidates previously subject to the deadline will thereafter be subject to the deadline as extended.
- 2.16.3 Bulky tenders which will not fit in the tender box shall be received by the procuring entity as provided for in the appendix.

2.17 Modification and withdrawal of tenders

- 2.17.1 The tenderer may modify or withdraw its tender after the tender's submission, provided that written notice of the modification, including substitution or withdrawal of the tender's is received by the procuring entity prior to the deadline prescribed for the submission of tenders.
- 2.17.2 The Tenderer's modification or withdrawal notice shall be prepared, sealed, marked, and dispatched in accordance with the provisions of paragraph 2.15. A withdrawal notice may also be sent by cable, but followed by a signed confirmation copy, postmarked not later than the deadline for submission of tenders.
- 2.17.3 No tender may be modified after the deadline for submission of tenders.
- 2.17.4 No tender may be withdrawn in the interval between the deadline for submission of tenders and the expiration of the period of tender validity specified by the tenderer on the Tender Form. Withdrawal of a tender during this interval may result in the Tenderer's forfeiture of its tender security, pursuant to paragraph 2.12.7.
- 2.17.5 The procuring entity may at any time terminate procurement proceedings before contract award and shall not be liable to any person for the termination.
- 2.17.6 The procuring entity shall give prompt notice of the termination to the tenderers and on request give its reasons for termination within 14 days of receiving the request from any tenderer.

2.18 **Opening of Tenders**

- 2.18.1 The Procuring entity will open all tenders in the presence of tenderers' representatives who choose to attend, at 11.00am, Wednesday, 11th March, 2020 at KCAA Auditorium on Ground Floor, Aviation House, JKIA, Nairobi. The tenderers' representatives who are present shall sign a register evidencing their attendance.
- 2.18.3 The tenderers' names, tender modifications or withdrawals, tender prices, discounts, and the presence or absence of requisite tender security and such other details as the Procuring Entity, at its discretion, may consider appropriate, will be announced at the opening.
- 2.18.4 The procuring entity will prepare minutes of the tender opening which will be submitted to the tenderers that signed the tender opening register and will have made the request.

2.19 Clarification of tenders

- 2.19.1 To assist in the examination, evaluation and comparison of tenders the procuring entity may at its discretion, ask the tenderer for a clarification of its tender. The request for clarification and the response shall be in writing, and no change in the prices or substance shall be sought, offered, or permitted.
- 2.19.2 Any effort by the tenderer to influence the procuring entity in the procuring entity's tender evaluation, tender comparison or contract award decisions may result in the rejection of the tenderers tender.

Comparison or contract award decisions may result in the rejection of the tenderers' tender.

2.20 Preliminary Examination and Responsiveness

- 2.20.1 The Procuring entity will examine the tenders to determine whether they are complete, whether any computational errors have been made, whether required securities have been furnished whether the documents have been properly signed, and whether the tenders are generally in order.
- 2.20.2 Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail, and the total price shall be corrected. If the candidate does not accept the correction of the errors, its tender will be rejected, and its tender security may be forfeited. If there is a discrepancy between words and figures, the amount in words will prevail.
- 2.20.3 The Procuring entity may waive any minor informality or nonconformity or irregularity in a tender which does not constitute a material deviation, provided such waiver does not prejudice or affect the relative ranking of any tenderer.
- 2.20.4 Prior to the detailed evaluation, pursuant to paragraph 23, the Procuring entity will determine the substantial responsiveness of each tender to the tender documents. For purposes of these paragraphs, a substantially responsive tender is one which conforms to all the terms and conditions of the tender documents without material deviations. The Procuring entity's determination of a tender's responsiveness is to be based on the contents of the tender itself without recourse to extrinsic evidence.
- 2.20.5 If a tender is not substantially responsive, it will be rejected by the Procuring entity and may not subsequently be made responsive by the tenderer by correction of the nonconformity.

2.21 Conversion to a single currency

2.21.1 Where other currencies are used, the procuring entity will convert those currencies to Kenya shillings using the selling exchange rate on the date of tender closing provided by the central bank of Kenya.

2.22 Evaluation and comparison of tenders.

- 2.22.1 The procuring entity will evaluate and compare the tenders which have been determined to be substantially responsive, pursuant to paragraph 2.20
- 2.22.2 The comparison shall be of the price including all costs as well as duties and taxes payable on all the materials to be used in the provision of the services.
- 2.22.3 The Procuring entity's evaluation of a tender will take into account, in addition to the tender price, the following factors, in the manner and to the extent indicated in paragraph 2.22.4 and in the technical specifications:
 - (a) Operational plan proposed in the tender;

- (b) Deviations in payment schedule from that specified in the Special Conditions of Contract;
- 2.22.4 Pursuant to paragraph 22.3 the following evaluation methods will be applied:

(a) Operational Plan.

The Procuring entity requires that the services under the Invitation for Tenders shall be performed at the time specified in the Schedule of Requirements. Tenders offering to perform longer than the procuring entity's required delivery time will be treated as non-responsive and rejected.

(b) Deviation in payment schedule.

Tenderers shall state their tender price for the payment on a schedule outlined in the special conditions of contract. Tenders will be evaluated on the basis of this base price. Tenderers are, however, permitted to state an alternative payment schedule and indicate the reduction in tender price they wish to offer for such alternative payment schedule. The Procuring entity may consider the alternative payment schedule offered by the selected tenderer.

- 2.22.5 The tender evaluation committee shall evaluate the tender within 15 days from the date of opening the tender.
- 2.22.6 To qualify for contract awards, the tenderer shall have the following:-
 - (a) Necessary qualifications, capability experience, services, equipment and facilities to provide what is being procured.
 - (b) Legal capacity to enter into a contract for procurement
 - (c) Shall not be insolvent, in receivership, bankrupt or in the process of being wound up and is not the subject of legal proceedings relating to the foregoing
 - (d) Shall not be debarred from participating in public procurement.

2.23. Contacting the procuring entity

- 2.23.1 Subject to paragraph 2.19, no tenderer shall contact the procuring entity on any matter relating to its tender, from the time of the tender opening to the time the contract is awarded.
- 2.23.2 Any effort by a tenderer to influence the procuring entity in its decisions on tender evaluation tender comparison or contract award may result in the rejection of the tenderers tender.

2.24 Award of Contract

a) Post qualification

2.24.1 In the absence of pre-qualification, the Procuring entity will determine to its satisfaction whether the tenderer that is selected as having submitted the lowest evaluated responsive tender is qualified to perform the contract satisfactorily.

- 2.24.2 The determination will take into account the tenderer's financial and technical capabilities. It will be based upon an examination of the documentary evidence of the tenderers qualifications submitted by the tenderer, pursuant to paragraph 2.1.2, as well as such other information as the Procuring entity deems necessary and appropriate.
- 2.24.3 An affirmative determination will be a prerequisite for award of the contract to the tenderer. A negative determination will result in rejection of the Tenderer's tender, in which event the Procuring entity will proceed to the next lowest evaluated tender to make a similar determination of that Tenderer's capabilities to perform satisfactorily.

b) Award Criteria

- 2.24.3Subject to paragraph 2.29 the Procuring entity will award the contract to the successful tenderer whose tender has been determined to be substantially responsive and has been determined to be the lowest evaluated tender, provided further that the tenderer is determined to be qualified to perform the contract satisfactorily.
- 2.24.4 The procuring entity reserves the right to accept or reject any tender and to annul the tendering process and reject all tenders at any time prior to contract award, without thereby incurring any liability to the affected tenderer or tenderers or any obligation to inform the affected tenderer or tenderers of the grounds for the procuring entity's action. If the procuring entity determines that none of the tenderers is responsive; the procuring entity shall notify each tenderer who submitted a tender.
- 2.24.5 A tenderer who gives false information in the tender document about its qualification or who refuses to enter into a contract after notification of contract award shall be considered for debarment from participating in future public procurement.

2.25 **Notification of award**

- 2.25.1 Prior to the expiration of the period of tender validity, the Procuring entity will notify the successful tenderer in writing that its tender has been accepted.
- 2.25.2 The notification of award will signify the formation of the Contract subject to the signing of the contract between the tenderer and the procuring entity pursuant to clause 2.29. Simultaneously the other tenderers shall be notified that their tenders have not been successful.
- 2.25.3 Upon the successful Tenderer's furnishing of the performance security pursuant to paragraph 31, the Procuring entity will promptly notify each unsuccessful Tenderer and will discharge its tender security, pursuant to paragraph 2.12

2.26 Signing of Contract

- 2.26.1 At the same time as the Procuring entity notifies the successful tenderer that its tender has been accepted, the Procuring entity will simultaneously inform the other tenderers that their tenders have not been successful.
- 2.26.2 Within Thirty (30) days of receipt of the Contract Form, the successful tenderer shall sign and date the contract and return it to the Procuring entity.

2.26.3 The parties to the contract shall have it signed within 30 days from the date of notification of contract award unless there is an administrative review request.

2.27 **Performance Security**

- 2.27.1 Within fourteen (14) days of the receipt of notification of award from the Procuring entity, the successful tenderer shall furnish the performance security in accordance with the Conditions of Contract, in the Performance Security Form provided in the tender documents, or in another form acceptable to the Procuring entity.
- 2.27.2 Failure of the successful tenderer to comply with the requirement of paragraph 2.29 or paragraph 2.30.1 shall constitute sufficient grounds for the annulment of the award and forfeiture of the tender security, in which event the Procuring entity may make the award to the next lowest evaluated or call for new tenders.

2.28 Corrupt or Fraudulent Practices

- 2.28.1 The Procuring entity requires highest that tenderers observe the standard of ethics during the procurement process and execution of contracts. A tenderer shall sign a declaration that he has not and will not be involved in corrupt or fraudulent practices.
- 2.28.1 The procuring entity will reject a proposal for award if it determines that the tenderer recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question;
- 2.28.2 Further, a tenderer who is found to have indulged in corrupt or fraudulent practices risks being debarred from participating in public procurement in Kenya.

Appendix to instructions to tenderers

The following information for procurement of services shall complement or amend the provisions of the instructions to tenderers. Wherever there is a conflict between the provisions of the instructions to tenderers and the provisions of the appendix, the provisions of the appendix herein shall prevail over those of the instructions to tenderers

10.	1 Original, 1 Copy of bid documents and MUST be serialized (paged) and	
10.	a soft copy in a CD/DVD	
11.	Duly filled, signed and stamped confidential business questionnaire (Indicate all the	
	directors and respective shares).	
12.	Duly signed Sworn Anti-corruption affidavit by the commissioner of oaths	
13.	Audited Accounts for the past two (2) years (2019/2018 and 2017)	
14.	1 ,	
	receivership, bankrupt or in the process of being wound up.	
15.	Submit a statement in the bidder's letter head indicating that the person or his or	
	her sub-contractor, if any is not debarred from participating in procurement	
16	proceedings.	
16.	Submit a statement in the bidder's letter head indicating that the person participating in procurement proceedings has not been convicted of corrupt or	
	fraudulent practices	
	PASS/FAIL

INSTRUCTIONS TO BIDDERS

- 1. The specifications requirements consist of four parts. All the requirements are mandatory. Bidders must indicate their response on all the requirements.
- 2. Bidders MUST be certified partners at least Silver and above for the appliance they are providing (attach manufacturer's authorization partnership certificate)
- 3. Bidders MUST respond in writing (detailed sentence responses) in each table on the Vendor's response column. Responses such as marking compliant, partially compliant, non-compliant, ($\sqrt{}$) or (X) shall be treated as **INVALID entries** and shall not be evaluated.
- 4. Datasheets/Brochures MUST be attached for the appliance to be supplied. The datasheet **MUST specify exact make**, **series and model**.

Part 1: General Requirements

No	Requirement	Bidder's Response (indicate cross reference in the bid document)
Firev	vall Requirements (evidences MUST be attached for ea	
1.	The proposed solution MUST be in the Leaders Quadrant of Gartner magic quadrant for Enterprise Network Firewall (ENF).	. ,
2.	The proposed solution MUST be in the NSS Labs Scoring; a) 2019 Next Generation Firewall (NGFW) Test (Recommended) b) 2018 and 2019 Datacenter Intrusion Prevention Systems (DCIPS) Test (Recommended) c) 2019 Breach Prevention Systems (Recommended)	
3.	The proposed solution MUST be certified by ICSA Labs in the following tests; a) 2019 ICSA labs Firewall test b) 2019 ICSA labs Network IPS test c) 2019 ICSA labs SSL-TLS test	
Capa	city Requirements	
4.	Client References - Vendor shall provide at least 3 references from enterprise clients showing proof of implementation of an enterprise level IT data center firewall. The evidence submitted shall include: - Project completion certificates, project sign-offs and service level agreement where applicable	
5.	Certificate of Accreditation from ICT Authority. At least category 2 in both Information Security and Infrastructure.	
6.	Personnel Competencies -Vendor shall provide a tabulated matrix of key personnel indicating relevant skills and competencies for each. The Bidder Must have Engineers certified to high level of security certifications	

	for the proposed solutions i.e. Expert and	
	Professional level (attach certificate / any other	
	relevant evidence)	
7.	Partnership level - Vendor must be a certified partner for	
,,	the appliance they are providing. At a minimum the	
	Vendor's partnership level MUST, be Silver or higher.	
	(Certified Manufacturer's partnership certificate MUST be	
	attached	
	(NB: Not distributor or reseller letter)	
Infra	structure Requirements	
8.	Firewall Services - The solution shall facilitate publishing	
0.	and access of web applications hosted on a virtual	
	machine through https. Ability to map multiple web	
	applications to a single public IP or different public IP's.	
9.	Application services: The solution MUST allow granular	
۶.	access or denial of various web services and ports.	
	Additionally, support the creation of custom web ports	
	or applications in which one can grant or block access.	
10.	Segmentation - Segment network through	
10.	implementation of a DMZ for public facing Servers and a	
	Server farm VLAN for internal Servers. Implementation	
	shall be done in such a manner that web applications	
	can be provisioned easily and Server services shall be	
	readily available to cable and Wi-Fi connected internal	
	users.	
	NB: EASA shall provide the Core-switch.	
11.	Network monitoring & visibility - Real time visibility of	
	inbound and outbound traffic. Visibility shall be granular	
	to the extent of obtaining per user and/or application	
	visibility, furthermore a bandwidth management feature	
	allowing priority to applications e.g. locally hosted web	
	business applications. Additionally, the solution shall	
	provide real time monitoring and logging of events	
	displayed through status dashboard.	
12.	Reporting - Availability of system and custom reports. At	
	a minimum the following reports shall be extracted: -	
	Top domains. Top users, top applications and top	
	threats detected.	
Othe	r Mandatory Requirements	
13.	Site survey form - Bidders MUST carry out site survey	
	and have the site survey from dully filled and stamped.	
14.	Network diagram - Bidders MUST attach proposed	
	network diagram detailing all the infrastructure	
	components, their integration and logical routing from	
	WAN to DMZ, Server farm and internal LAN. Proposed	
	firewall MUST be support segmentation of network	
	services based (Staff, students, CCTV, Biometric)	
	January State (State)	

Part 2: MANDATORY TECHNICAL REQUIRMENTS – FUNCTIONAL

No	Features & Requirements	Bidders Response (provide cross-reference in the bid document where the requirement is met)
1.	ISP redundancy with high availability option- The system shall support multiple ISP connections with interconnected Active-Active primary and secondary appliances	
2.	Web filtering and URL filtering: Support monitoring All web activities. Granular blocking and filtering provide web categories to allow, log, or block. Comprehensive URL database provides rapid and comprehensive protection	
3.	Application Control: Create policies to allow, deny, or restrict access to applications or entire categories of applications. Advanced detection signatures identify Apps, DB applications, web applications and protocols; both blacklist and white list approaches can allow or deny traffic. Ability to prioritize applications.	
4.	Intrusion prevention system (IPS): Real-time threat intelligence updates to block and prevent advanced cyber threats.	
5.	Advanced malware protection: Advanced protection, detection and prevention that includes: Antivirus, Anti-bot, content disarm and reconstruction (CDR), Virus outbreak protection service (VOS) and sandboxing.	
6.	Indicators of compromise: Automated breach defense system that continuously monitors network for attacks, vulnerabilities, and persistent threats. Protection against legitimate threats, guarding customer data and defending against fraudulent access, malware, and breaches. Detect and prevent fraud from compromised devices or accounts	
7.	Threat Extraction (Sandboxing). Advanced threat detection solution that performs dynamic analysis to identify previously unknown malware. The solution must provide the ability to Protect against zero-day & unknown malware attacks before static signature protections have been created.	
8.	User Identity Acquisition: Must be able to acquire user identity by querying Microsoft Active Directory based on security events Must have a browser-based User Identity authentication method for non-domain users or assets. Must be able to acquire user identity from Microsoft Active Directory without any type of agent installed on the domain controllers	
9.	Event Logging and Status reporting: Support for event logging and generation of custom reports.	
10.	Licensing and Support: Enterprise protection licensing suite, management license and analyser license with 24/7 support. Licenses MUST be for 3 years. Direct SLA vendor support for 3 years from commissioning date.	

Part 3: MANDATORY DEVICE AND SYSTEM REQUIREMENTS

No	Features & Requirements	Bidders Response (provide cross-reference in the bid document where the requirement is met)
	Device	.
1.	a) Must support at least 8 x 1GE RJ45 interfaces	
	b) Must support at least 8 x 1GE SFP slots	
	c) Must be support at least 2 x 10GE SFP+ slots	
	d) Must support at least 7 Million Maximum Concurrent Sessions	
	e) Must support at least 400,000 New Sessions/Second	
	f) Must support at least 30Gbps of firewall throughput	
	g) Must support at least 10 Gbps Enterprise/Production IPS Throughput	
	h) Must support at least 9 Gbps Enterprise/Production NGFW Throughput	
	i) Must support at least 7 Gbps SSL Inspection Throughput	
	j) Must support at least 7 Gbps Enterprise/Production Threat Protection Throughput	
	k) Must support at least 480GB SSD storage	
	I) Must be supplied with at least 2,000 SSL VPN licenses	
	m) Must support at least 10,000 IPSec site-to-site VPN tunnels	
	n) Must have the following licenses included Application	
	Control, IPS, Anti Malware, Web Filtering, DNS Filtering, Mobile Security, and Sandbox	
2.	Stateful Firewall	L
	a) The Firewall Must be ICSA Labs certified for Enterprise	
	Firewall or EAL 4 certified, if not the same model	
	b) It Must be possible to operate the firewall in "bridge mode" or "transparent mode" apart from the standard NAT mode	
	c) The Firewall must provide NAT functionality, including PAT.	
	d) Must support "Policy-based NAT"	
	e) The Firewall Must provide advanced NAT capabilities, supporting NAT Traversal for services like SIP/H.323 /SCCP	
	f) Firewall Must support Voice based protocols like H.323, SIP, SCCP, MGCP etc and RTP Pinholing.	
	g) The Firewall Must support User-Group based Authentication (Identity based Firewalling) & Scheduling	
	h) IPv6 support for both NAT and Transparent Mode	
3.	Authentication Features	-

	a	Support for authentication at the firewall policy level (Local and Remote)	
	b	Support for RSA SecureID or other Token based	
		products PARTIE L DAR and TAGAGG	
	C	Support for external RADIUS, LDAP and TACACS+ integration for User and Administrator Authentication	
	d	d) Support for Native Windows Active Directory or Novell eDirectory Integration	
	е	e) Must support authentication based on LDAP Groups	
	f) Must support PKI / Digital Certificate based two-factor Authentication for both Users and Firewall Administrators	
4.	VPN		
	-	The VPN Must be integrated with firewall and Must be ICSA abs certified for both IPSec and SSL-TLS	
		Must support the following protocols: -	
	b) [DES & 3DES	
	c) N	4D5, SHA-1 & the more secure SHA-256 authentication	
	-	Diffie-Hellman Group 1, Group 2, Group 5 & the more secure Group 14.	
	e) I	nternet Key Exchange (IKE) v1 as well as IKE v2 algorithm	
	_	The new encryption standard AES 128, 192 & 256 Advanced Encryption Standard)	
	g) N	Must support Hub and Spoke VPN topology	
	,	PSec NAT Traversal & Dead Peer Detection Must be supported	
	,	PSec VPN Must support XAuth over RADIUS and RSA SecurID or similar product.	
	r	Must have integrated SSL VPN with no user license slab estriction. Please specify if the product does not follow the equired licensing policy	
	,	Must support SSL Two-factor Authentication with Digital Certificates	
	l) N	Must support Single Sign-On Bookmarks for SSL Web VPN	
	, (Must support Windows, Linux and MAC OS for SSL-VPN Must have always-on clients for these OS apart from prowser based access)	
	n) N	Must support NAT within IPSec/SSL VPN tunnels	
	,	Must also support PPTP and L2TP over IPSec VPN protocols.	
5.	High	Availability	
	_	The device must support Active-Active as well as Active-Passive redundancy.	
	b) T	The Firewall must support stateful failover for both Firewall and VPN sessions.	

Detection and Notification as well as Link Status Monitor d) Must support Virtual router redundancy protocol (VRRP) and Link Failure Control a) The device must support Web UI (HTTP/HTTPS) and CLI (Telnet / SSH) based Management b) Must have configurable option to define remote access to the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (RJ45 or D89) d) The device must have SNMPv2c and SNNPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI j) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have notection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must have protection for 3000+ signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. f) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device)		c)	The HA Architecture Must have the ability for Device Failure	
and Link Failure Control Amagement Features a) The device must support Web UI (HTTP/HTTPS) and CLI (Telnet / SSH) based Management b) Must have configurable option to define remote access to the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (RN45 or DB9) d) The device must have SNMPV2c and SNMPV3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / systog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI j) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have note continued and provide a service attacks. e) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be provent denial of service and Distributed Denial of Service attacks. e) Must be provent denial of service and Distributed Denial of Service attacks. e) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPV6 encapsulated			Detection and Notification as well as Link Status Monitor	
6. Management Features a) The device must support Web UI (HTTP/HTTPS) and CLI (Telnet / SSH) based Management b) Must have configurable option to define remote access to the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (RM5 or DB9) d) The device must have SNMPV2-cand SNMPV3 support (for sending alerts to NM5 in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI j) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must have protection for 3000+ signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet (i.e. no dependency on any intermediate device) j) Supports automatic Attack database updates directly over the internet (i.e. no dependency on any intermediate device)		d)	Must support Virtual router redundancy protocol (VRRP)	
a) The device must support Web UI (HTTP/HTTPS) and CLI (Telnet / SSH) based Management b) Must have configurable option to define remote access to the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (RJ45 or DB9) d) The device must have SNMPv2c and SNMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet (i.e. no dependency on any intermediate device) j) Supports automatic Attack database updates directly over the internet (i.e. no dependency on any intermediate device)			and Link Failure Control	
(Telnet / SSH) based Management b) Must have configurable option to define remote access to the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (R145 or DB9) d) The device must have SNMPv2c and SNMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must bave protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated	6.			
the Firewall on any interface and restrict the same to a specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (RJ45 or DB9) d) The device must have SMMPv2c and SMNPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI i) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports automatic Attack deribase updates directly over the internet. (i.e. no dependency on any intermediate device)		a)		
specific IP/Subnet (i.e. Trusted Hosts for Management) c) There must be a means of connecting directly to the firewall through a console connection (R145 or D89) d) The device must have SNMPv2c and SNMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device)		b)	Must have configurable option to define remote access to	
c) There must be a means of connecting directly to the firewall through a console connection (RJ45 or DB9) d) The device must have SNMPv2c and SNMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated			•	
firewall through a console connection (RJ45 or DB9) d) The device must have SNMPv2c and SMMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated				
d) The device must have SNMPv2c and SNMPv3 support (for sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		c)		
sending alerts to NMS in case of threats and system failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support ganular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		- 1	, ,	
failures). e) Provision to generate automatic notification of events via mails / syslog f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		a)		
f) Provision to send alerts to multiple email recipients g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated			failures).	
g) Support for role based administration of firewall h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI j) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		e)	_	
h) Must support simultaneous login of Multiple Administrators. i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		f)	Provision to send alerts to multiple email recipients	
i) Must have provision to customize the dashboard (e.g.: by selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. (i.e. no dependency on any intermediate device) j) Supports attack recognition inside IPv6 encapsulated		g)	Support for role based administration of firewall	
selecting suitable Widgets) j) The Firewall must provide a means for exporting the firewall rules set and configuration to a text file via Web or TFTP k) Support for Image upgrade via FTP, TFTP and WebUI l) Must support system software rollback to the previous version after upgrade 7. Intrusion Prevention a) Must have integrated Network Intrusion Prevention System (NIPS) and must be ICSA Labs certified. b) Must have a built-in Signature and Anomaly based IPS engine on the same unit c) Must have protection for 3000+ signatures d) Able to prevent denial of service and Distributed Denial of Service attacks. e) Must be able to exclude certain hosts from scanning of particular signatures f) Supports CVE-cross referencing of threats where applicable. g) Must provide the facility to configure Profile based sensors (Client/Server) for ease of deployment h) Must support granular tuning with option to configure Overrides for individual signatures. i) Supports automatic Attack database updates directly over the internet. 		j)	Supports attack recognition inside IPv6 encapsulated	

	k)	Supports user-defined signatures (i.e. Custom Signatures)	
	- 15	with Regular Expressions.	
	l)	Supports several prevention techniques including Drop-	
		Packet, TCP-Reset (Client, Server & both) etc. List all	
		prevention options	
	m)	Must offer a variety of built-in responses including dashboard	
		alerts, syslog / email notifications, SNMP traps and Packet	
		Capture log. List all response options, excluding prevention	
		responses	
	n)	Must Identify and control over 1000+ applications (i.e.	
		Application control feature)	
	0)	Must perform Traffic Shaping of popular P2P applications like	
		KaZaa, Gnutella, BitTorrent, WinNY, eDonkey etc	
	p)	Must control popular IM/P2P applications regardless of	
		port/protocol like Yahoo, MSN, Skype, AOL, ICQ etc.	
8.	An	tivirus and Antimalware	
	a)	The appliance Must facilitate embedded antivirus support	
		which is ICSA Labs certified	
	h)	Must include Antispyware and Worm Prevention	
	C)	Must have option to schedule automatic updates of the new	
		virus pattern.	
	d)	Gateway AV Must be supported for real-time detection of	
		viruses and malicious code for HTTP, HTTPS, FTP, SMTP,	
		SMTPS, POP3 and IMAP, NNTP and IM	
	e)	Must have configurable policy options to select what traffic to	
		scan for viruses	
	f)	Must have option to configure to respond to virus detection	
		at the gateway in several ways i.e. Delete the file, Alert	
		email, Quarantine etc.	
	g)	Must have options to prevent user downloads based on file	
		extension as well as file type.	
	h)	Must have support for "Flow-Based Antivirus Scanning Mode"	
		for high throughput requirements.	
	i)	The solution Must be capable of scanning encrypted VPN	
		tunnel traffic originating from the unit for virus	
	j)	Must support Antivirus scanning of IPv6 traffic	
9.		· · · · · · · · · · · · · · · · · · ·	
	Th	reat Emulation/Extraction	
	a)	The solution must be tightly integrated with the cloud threat	
		mitigation in order to make the protection more effective and	
		updated so as to minimize the occurrence of false positives.	
	b)	The solution must have multi-layer of detection process with	
		the malicious code emulation and execution in the VM	
		environment.	
	c)	The solution must be able to inspect the web session to	
		detect and notify the malicious web activity including	
		malicious file downloads through the web/internet.	
	d)	The solution must be able to store payload and artifacts of	
	′	the detected threats for further analysis and incident time	
		lines that is with the third party as well.	
I		and the same that a second second	

	e)	detect and block malware in common file formats including	
		but not limited to executable, JAVA, PDF, MS Office	
		documents, common multimedia contents such as JPEG,	
		QuickTime, MP3 and ZIP/RAR/7ZIP/TNEF archives, asf, chm,	
		com, dll, doc, docx, exe, gif, hip, htm, ico, jar, jpeg, jpg,	
		mov, mps, mp4, pdf, png, ppsx, ppt, pptx, qt, rm, rtf, swf,	
		tiff, url, vbs, vcf, xls, xlsx, bat, cmd, js, wsf, xml, flv, wav,	
		avi, mpg, midi, vcs, lnk, csv, rm to prevent advanced	
		Malware and Zero-day attacks.	
	f)	The solution shall report source IP, destination IP, source	
	'	port, destination port and complete URL of the attack. The	
		solution must also assign a unique identification number to	
		each identified/detected threat for future reference.	
	g)	The solution shall detect the entire infection lifecycle and	
	9)	provide stage-by-stage analysis of the attack starting from	
		system exploitation to data exfiltration	
	h)	The solution Must be part of an integrated model therefore it	
	'''	Must interact with other security network element in order to	
		give full proof detection and correction model rather than	
		having a point product.	
	i)	The solution must be able to detect and report malware by	
	ו'ן	using multiple client environments (operating systems with	
		multiple service pack levels) supporting both x64 and x86	
		architectures.	
	j)	The solution Must support logging of important parameters	
		like Source IP, Destination IP, ports, protocol, Domain, time	
	14	stamp etc. of the malicious web sessions	
	k)	The solution must be based on algorithm, which must be	
		able to detect maximum Malware or rogue elements with	
	1	each signature.	
	l)	The solution Must have ability to block all outbound call- back	
10	 	communication initiated by the internal clients (infected)	
10.		L Filtering	
	(a)	The appliance Must facilitate embedded Web Content	
		Filtering feature	
	b)	Web content filtering solution Must work independently	
		without the need to integrate with External proxy server.	
	c)	Must have facility to block URL' based on categories. Must	
		support HTTP and HTTPS based traffic?	
	d)	URL database Must have more than 2 billion URLs under 70+	
	L.	categories.	
	(e)	Must be able to block different categories/sites based on	
		User Authentication.	
	f)	Must have configurable parameters to block/allow unrated	
	-51	sites. Must have option to locally rate sites.	
	g)	Must have configurable options to allow/deny access to web	
	L)	sites in case if the URL rating service is unavailable	
	h)	Must have options to customize the "Blocked Webpage	
		Message" information displayed to end users	

	j)	Must have facility to schedule the configurations so that non-work related sites are blocked during office hours and allow access to all sites except harmful sites during non-office hrs. Must also have time-based quota The solution Must have options to block java applets, ActiveX as well as cookies	
	k)	The solution Must be able to block URLs hosting spywares / adwares etc.	
	l)	Must have configurable policy options to define the URL exempt list	
11. Traffic Optimization			
	a)	Must support WAN load balancing (weighted) algorithms by volume, sessions, source-destination IP, Source IP, and spillover	
	b)	Must support multi-path intelligence using rules defined by:	
	c)	Source address and/or user group	
	d)	Destination address and/or a selection of over 3,000 applications	
	e)	Path selection using particular link quality criteria or SLAs defined	
	f)	Must support traffic shaping and QoS per policy or applications: Shared policy shaping, per-IP shaping, maximum and guaranteed bandwidth, maximum concurrent connections per IP, traffic prioritization, Type of Service (TOS), and Differentiated Services (DiffServ) support	
	g)		
	h)	Must support traffic shaping policies that asigns traffic shape profile according to matching policy based on source, destination, service, application, application category, and/or URL category.	
	i)	Must support inline and out-of-path WAN optimization	
	j)	topology, peer to peer, and remote client support Must support at least CIFS, FTP, HTTP(S), MAPI and TCP	
	k)	WAN optimization protocols Must support multiple WAN optimization sessions on the	
		same tunnel	
	Ot	her Mandatory Requirements	
12.	ope NG	e platform must use a security-hardened, purpose-built erating system, and Must support the deployment option in FW mode.	
13.	pac pro	e platform Must use hardware acceleration to optimize the cket, encryption/decryption and application level content occssing.	
14.	Fire use	ensing: Must be per device license for unlimited users for ewall and other features. There Must not have any er/IP/host based licenses.	
15.		e solution must support Virtualization (i.e. Virtual Systems / tual Domains).	

16.	Each Virtual Domain Must be allowed to connect to Specific 3rd Party Authentication service, AD, Radius, Tacacs or other	
17.	Must support more than one ISP with automatic ISP failover	
18.	Must have support for Explicit Proxy and Transparent Proxy	
19.	Must form the heart of the security fabric by integrating networking and security solutions and 3rd party solutions	
20.	Must provide integrations to different security sensors and tools together to collect, coordinate, and respond to malicious behavior anywhere it occurs on your network in real time including 3rd party security products	
21.	Must support centralized management of the proposed firewall appliances	
22.	Must support centralized software upgrades and security updates for the managed devices	
23.	Must support Hierarchical Objects Database, reuse of common configurations	
24.	Must support automated device discovery support and maintain policies on same device types	
25.	Must support granular device and role based administration for large enterprises and multi-tenancy deployments	
26.	Must support centralized SD-WAN provisioning and monitoring	
27.	Must support automated templates and scripts for device provisioning automation and policy installation with JSON APIs or XML API, to reduce your management burden and operational costs	

Part 4: Mandatory Documentation and Training

No	Requirement	Vendors Response (Attach documentation and/or commitment in writing to meet the requirements)
1.	Project plan & schedule – bidders to attach sample project plan & schedule. Bidders shall provide a detailed work plan of how the project will be implemented indicating key milestones and delivery timelines.	
2.	SLA - 3 Years' Service Level Agreement (Attach sample SLA which must include proposed routine services/activities, contacts of key personnel with escalation matrix and response & resolution times for various issues reported)	
3.	On Premise Training - Comprehensive Administration and technical on premise knowledge transfer training for at least 3 ICT staff (training plan shall focus on implementation and configuration of implemented solution and shall include but not limited to: - appliance setup and maintenance, administration and backup, rules & policies, configuration & routing and application mapping & publishing).	

c) Financial Evaluation:

The winning bidder will be the lowest evaluated bidder among those who will have passed the mandatory technical evaluation as outlined in (a & b) above.

SECTION III: GENERAL CONDITIONS OF CONTRACT

TABLE OF CONTENTS

- 3.1 Definitions
- 3.2 Application
- 3.3 Standards
- 3.4 Use of contract documents and information
- 3.5 Patent Rights
- 3.6 Performance security
- 3.7 Inspections and tests
- 3.8 Payment
- 3.9 Prices
- 3.10 Assignment
- 3.11 Termination for default
- 3.12 Termination for insolvency
- 3.13 Termination for convenience
- 3.14 Resolution of disputes
- 3.15 Governing language
- 3.16 Force majeure
- 3.17 Applicable law
- 3.18 Notices

SECTION III: GENERAL CONDITIONS OF CONTRACT

3.1 **Definitions**

In this contract the following terms shall be interpreted as indicated:

- a) "The contract" means the agreement entered into between the Procuring entity and the tenderer as recorded in the Contract Form signed by the parties, including all attachments and appendices thereto and all documents incorporated by reference therein.
- b) "The Contract Price" means the price payable to the tenderer under the Contract for the full and proper performance of its contractual obligations.
- c) "The services" means services to be provided by the contractor including materials and incidentals which the tenderer is required to provide to the Procuring entity under the Contract.
- d) "The Procuring entity" means the organization sourcing for the services under this Contract.
- e) "The contractor means the individual or firm providing the services under this Contract.
- f) "GCC" means general conditions of contract contained in this section
- g) "SCC" means the special conditions of contract
- h) "Day" means calendar day

3.2 **Application**

These General Conditions shall apply to the extent that they are not superseded by provisions of other part of contract.

3.3 Standards

3.3.1 The services provided under this Contract shall conform to the 7 standards mentioned in the Schedule of requirements

3.5 Patent Right's

The tenderer shall indemnify the Procuring entity against all third-party claims of infringement of patent, trademark, or industrial design tights arising from use of the services under the contract or any part thereof.

3.6 **Performance Security**

Within twenty fourteen (14) days of receipt of the notification of Contract award, the successful tenderer shall furnish to the Procuring entity the performance security where applicable in the amount specified in Special Conditions of Contract.

- 3.6.2 The proceeds of the performance security shall be payable to the Procuring entity as compensation for any loss resulting from the Tenderer's failure to complete its obligations under the Contract.
- 3.6.3 The performance security shall be denominated in the currency of the Contract or in a freely convertible currency acceptable to the Procuring entity and shall be in the form of:
 - a) Cash.
 - b) A bank guarantee.
 - c) Such insurance guarantee approved by the Authority.
 - d) Letter of credit.
- 3.6.4 The performance security will be discharged by the procuring entity and returned to the candidate not later than thirty (30) days following the date of completion of the tenderer's performance of obligations under the contract, including any warranty obligations under the contract.

3.7 Inspections and Tests

- 3.7.1 The Procuring entity or its representative shall have the right to inspect and/or to test the services to confirm their conformity to the Contract specifications. The Procuring entity shall notify the tenderer in writing, in a timely manner, of the identity of any representatives retained for these purposes.
- 3.7.2 The inspections and tests may be conducted on the premises of the tenderer or its subcontractor(s). If conducted on the premises of the tenderer or its subcontractor(s), all reasonable facilities and assistance, including access to drawings and production data, shall be furnished to the inspectors at no charge to the Procuring entity.
- 3.7.3 Should any inspected or tested services fail to conform to the Specifications, the Procuring entity may reject the services, and the tenderer shall either replace the rejected services or make alterations necessary to meet specification requirements free of cost to the Procuring entity.
- 3.7.4 Nothing in paragraph 3.7 shall in any way release the tenderer from any warranty or other obligations under this Contract.

3.8 **Payment**

3.8.1 The method and conditions of payment to be made to the tenderer under this Contract shall be specified in SCC

3.9 **Prices**

Prices charged by the contractor for services performed under the Contract shall not, with the exception of any Price adjustments authorized in SCC, vary from the prices by

the tenderer in its tender or in the procuring entity's request for tender validity extension as the case may be. No variation in or modification to the terms of the contract shall be made except by written amendment signed by the parties.

3.10 **Assignment**

The tenderer shall not assign, in whole or in part, its obligations to perform under this contract, except with the procuring entity's prior written consent.

3.10 Termination for Default

The Procuring entity may, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the tenderer, terminate this Contract in whole or in part:

- a) If the tenderer fails to provide any or all of the services within the period(s) specified in the Contract, or within any extension thereof granted by the Procuring entity.
- b) If the tenderer fails to perform any other obligation(s) under the Contract.
- c) If the tenderer, in the judgment of the Procuring entity has engaged in corrupt or fraudulent practices in competing for or in executing the Contract.
- d) In the event the Procuring entity terminates the Contract in whole or in part, it may procure, upon such terms and in such manner as it deems appropriate, services similar to those undelivered, and the tenderer shall be liable to the Procuring entity for any excess costs for such similar services.

3.12 Termination of insolvency

The procuring entity may at the any time terminate the contract by giving written notice to the contractor if the contractor becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the contractor, provided that such termination will not produce or affect any right of action or remedy, which has accrued or will accrue thereafter to the procuring entity.

3.13 Termination for convenience

- 3.13.1 The procuring entity by written notice sent to the contractor may terminate the contract in whole or in part, at any time for its convenience. The notice of termination shall specify that the termination is for the procuring entity convenience, the extent to which performance of the contractor of the contract is terminated and the date on which such termination becomes effective.
- 3.13.2 For the remaining part of the contract after termination the procuring entity may elect to cancel the services and pay to the contractor on agreed amount for partially completed services.

3.14 Resolution of disputes

The procuring entity's and the contractor shall make every effort to resolve amicably by direct informal negotiations any disagreement or dispute arising between them under or in connection with the contract.

If after thirty (30) days from the commencement of such informal negotiations both parties have been unable to resolve amicably a contract dispute either party may require that the dispute be referred for resolution to the formal mechanisms specified in the SCC.

3.15 Governing Language

The contract shall be written in the English language. All correspondence and other documents pertaining to the contract, which are exchanged by the parties, shall be written in the same language.

3.16 Force Majeure

The contractor shall not be liable *for* forfeiture of its performance security, or termination for default if and to the extent that it's delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

3.17 Applicable Law.

The contract shall be interpreted in accordance with the laws of Kenya unless otherwise specified in the SCC

3.18 Notices

Any notices given by one party to the other pursuant to this contract shall be sent to the other party by post or by fax or E-mail and confirmed in writing to the other party's address specified in the SCC

A notice shall be effective when delivered or on the notices effective date, whichever is later.

SECTION IV: SPECIAL CONDITIONS OF CONTRACT

- 4.1 Special conditions of contract shall supplement the general conditions of contract, wherever there is a conflict between the GCC and the SCC, the provisions of the SCC herein shall prevail over those in the GCC.
- 4.2 Special conditions of contract with reference to the general conditions of contract.

General conditions of contract reference	Special conditions of contract
3.8	Payment shall be made after the services have been satisfactorily provided and upon submission of an invoice after attaining agreed deliverables.
3.9	Prices shall be maintained for a period of one year.
23.14	In case of a dispute between the purchaser and the supplier, the dispute shall be referred arbitration in accordance with the laws of Kenya.
3.17	The applicable law shall be Kenyan Law
3.18	Kenya Civil Aviation Authority, P.O Box 30163-00100, NAIROBI, GPO.

SECTION V: DESCRIPTION OF SERVICES

FUNCTIONAL SPECIFICATIONS FOR THE ADVANCED HARDWARE FIREWALL AND NETWORK SEGMENTATION SERVICES:

1.0 INTRODUCTION

This section provides functional specifications and requirements for an advanced hardware firewall and network segmentation services.

	iced hardware firewall and network segmentation services.
No	Features & Requirements
1.	ISP redundancy with high availability option- The system shall support multiple ISP connections with interconnected Active-Active primary and secondary appliances
2.	Web filtering and URL filtering: Support monitoring All web activities. Granular blocking and filtering provide web categories to allow, log, or block. Comprehensive URL database provides rapid and comprehensive protection
3.	Application Control: Create policies to allow, deny, or restrict access to applications or entire categories of applications. Advanced detection signatures identify Apps, DB applications, web applications and protocols; both blacklist and white list approaches can allow or deny traffic. Ability to prioritize applications.
4.	Intrusion prevention system (IPS): Real-time threat intelligence updates to block and prevent advanced cyber threats.
5.	Advanced malware protection: Advanced protection, detection and prevention that includes: Antivirus, Anti-bot, content disarm and reconstruction (CDR), Virus outbreak protection service (VOS) and sandboxing.
6.	Indicators of compromise: Automated breach defense system that continuously monitors network for attacks, vulnerabilities, and persistent threats. Protection against legitimate threats, guarding customer data and defending against fraudulent access, malware, and breaches. Detect and prevent fraud from compromised devices or accounts
7.	Threat Extraction (Sandboxing) . Advanced threat detection solution that performs dynamic analysis to identify previously unknown malware. The solution must provide the ability to Protect against zero-day & unknown malware attacks before static signature protections have been created.
8.	User Identity Acquisition: Must be able to acquire user identity by querying Microsoft Active Directory based on security events Must have a browser-based User Identity authentication method for non-domain users or assets. Must be able to acquire user identity from Microsoft Active Directory without any type of agent installed on the domain controllers
9.	Event Logging and Status reporting: Support for event logging and generation of custom reports.
10.	Licensing and Support: Enterprise protection licensing suite, management license and analyser license with 24/7 support. Licenses MUST be for 3 years. Direct SLA vendor support for 3 years from commissioning date.

SECTION VII - PRICE SCHEDULE

NAME OF TENDER: TENDER NUMBER: KCAA/041/2019- 2020

TENDER FOR THE SUPPLY, INSTALLATION, CONFIGURATION, INTEGRATION, TESTING, TRAINING AND COMMISIONING OF AN ADVANCED HARDWARE FIREWALL AND NETWORK SEGMENTATION SERVICES AT EASA

Note: Costs MUST include ALL applicable taxes

No	Item Descr	iption	Quantity	Unit Cost	Total Cost
1.	Supply delivery and installation of appliance - Configured for high availability		2		
2.	Delivery of licenses	Appliance license inclusive of support- Enterprise protection license bundle for 3 years	2		
		Management license for 3 years Analyzer license for 3 years	1		
3.	Implementation: Installation & configuration (2 appliances configured for high availability), Integration with gateway routers, configuring zones and segmenting servers, configuring rules & policies, Creating DMZ and provisioning web applications, integration testing and commissioning		LOT
